## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03/30/2010 has been entered.

### *Allowance*

2. Based on new amendments filed 07/13/2010 and based on further search update, claims 69-97 are allowed.

3. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach, suggest or disclose the unique claimed features "Method and system for transmitting/receiving formatted text from a streaming server to a client using a Real-time Transport Protocol (RTP) in a communication system, the formatted text comprises a plurality of text samples associated with at least one text sample format description, the sample format description is signaled in-band to the client, the method and system comprising determining whether a text sample format description for a particular text sample to be added to at least one data packet is already included in the at least one data packet for another text sample within the at least one data packet, wherein the at least one data packet is to be transmitted to the client during a given communication session; (1) if the text sample format description for said particular text sample to be added to the at least one data packet is already included in the at least one data packet, adding said particular text sample to the at least one data packet without adding the text sample format description for said particular text sample, (2) if the text sample format description for said particular text sample to be added to the at least one data packet is not already included in the at least one data packet, determining whether the text sample format description for said particular text sample has already been provided to the client

Art Unit: 2617

for another earlier text sample included in a previously transmitted data packet in said communication session, (3) if the text sample format description for said particular text sample has already been provided to the client for another earlier text sample by being included in a previously transmitted data packet in said communication session, adding said particular text sample to the at least one data packet without adding, the text sample format description for said particular text sample, and (4) if the text sample format description for said particular text sample is not already included in said at least one data packet for another text sample within the at least one data packet and has not already been provided to the client for another earlier text sample by being included in a previously transmitted data packet in said communication session, adding said particular text sample and its text sample format description to the at least one data packet, and transmitting the at least one data packet to the client.”

Therefore, claims 69-97 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
